## ACRYLITE® LED

### diffused sign grade (SignFlex)

ACRYLITE® LED diffused sign grade is, specially formulated for LED sign faces. It possesses a frosted appearance and unique optical properties that evenly diffuse light and hide LED hot spots without the use of a diffuser film.

The frosted surface also works to hide fingerprints and scratches which helps maintain the service life.

This innovative acrylic product offers superior impact and weather resistance and is ideal for both interior and outdoor applications.

#### Features & Benefits

- Excellent diffusing properties; eliminated appearance of LED light pinpoints
- Impact-modified for increased durability
- Lightweight for reduced freight costs, easy handling and trouble-free installation
- East to cut, route and drill

#### Standard Product Specifications

Sizes: 75" x 100" and 75" x 125"

Thickness: .177"

Colors: White WDR58 and WDR52
